Criterion	Evaluation metrics	Weight
Understanding of current state of the art and emerging trends	Demonstrates a clear understanding of the current state of the art and emerging trends.	20
Identification of technology gaps	Identifies critical technology gaps that prevent the problem from being successfully addressed.	20
Approach to bridging technology gaps	Presents a clear and compelling idea, accompanied by a technical approach to bridge the technology gaps identified. Describes how the proposed approach fits into the technology landscape. Demonstrates an understanding of the impact addressing the technology gaps would have in advancing the current state-of-the-art.	40
Innovation	Demonstrates creativity and novelty in the approach. Submissions that propose significant improvements, as opposed to incremental improvements, will be more favorably scored.	10
Implementation Considerations	Describes how the proposed approach would be implemented. Discusses the potential risks and risk mitigation strategies, how the proposed solution would integrate into a broad extraction-to-analysis systems approach, and what expertise and resources are required. Addresses what open questions still need to be thought through to realize the proposed approach.	10
